

The following is a brief description of services and supports provided by the Helen Farabee Centers to persons with intellectual developmental disabilities (IDD) and who are general revenue clients (GR) at least 6 years of age.

Crisis IDD Unit/Haven House

The housing unit serves persons who have IDD who present a psychiatric crisis or are in need of planned respite due to behavioral issues through an Intensive Case Management Behavioral Support Team and IDD Crisis Respite Unit.

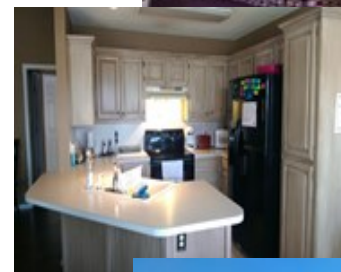

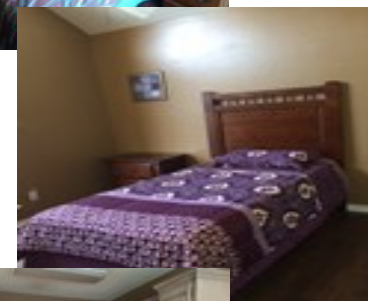

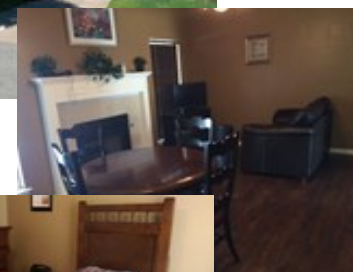

The unit will offer a less restrictive alternative for individuals with IDD allowing for an enhanced crisis delivery system, ensuring individuals remain in a community setting and providing short-term 24 hour care for persons who are vulnerable for hospitalization or jail, due to risk of self harm or harm to others.

Crisis

The Crisis Unit provides a safe alternative to placing individuals in hospital emergency rooms, state hospitals, and other behavioral health facilities. Crisis Services offer short-term 24 hour care up to 14 days in a least restrictive residential environment to persons who are vulnerable for hospitalization because they are at risk to self and others. Eligibility requires the need for direct supervision, but ineligible for hospitalization.

Respite

Respite is either planned or emergency relief designed to avoid caregiver exhaustion of an individual's unpaid caregiver on a short-term basis or when the caregiver is temporarily unavailable. Respite is provided by trained staff and will occur in residential environment at Haven House. Length of stay is up to 14 days.
